

Contents

01	Advanced DevOps Engineering	5
	Advanced Git & CI/CD Engineering	6
	Docker & Container Security Engineering	39
	Kubernetes Production Concepts	63
	Observability & Monitoring	86
02	Python for AI & AI Engineering	106
	Python Programming Fundamentals	107
	Advanced Python for AI	114
	Python for Data & ML	120
	Python for GenAI Applications	126
03	MLOps Engineering	132
	ML Lifecycle & Experiment Tracking	133
	Model Packaging & Serving	154
	CI/CD for Machine Learning	191
	Data Validation & Monitoring	237
04	Platform Engineering	255
	Infrastructure as Code (Terraform Advanced)	257
	GitOps & Continuous Delivery	279
	Internal Developer Platform (IDP)	314
05	AI Platform Integration & Production Architecture	343
	End-to-End AI Platform Architecture	344
	Advanced Deployment Strategies	354
	Security & Governance	364
	Career Positioning & Branding	379

06	Generative AI Fundamentals	389
	Foundations of Generative AI	390
	Prompt Engineering	395
	LLM APIs	410
07	Retrieval Augmented Generation (RAG)	416
	RAG Foundations	417
	Vector Databases	425
	Advanced RAG	432
08	AI Agents & Agentic AI	439
	AI Agent Fundamentals	440
	Agent Frameworks	448
	Agent Patterns	455
09	Agent Memory, Tools & MCP	461
	Memory Systems	462
	Tool Calling	468
	Model Context Protocol (MCP)	475
10	AI Engineering & LLMOps	482
	LLMOps Foundations & AI Delivery	483
	AI Observability & Production Monitoring	490
	AI Safety, Guardrails & Governance	496
11	Enterprise Agentic Systems	502
	Enterprise AI Platform Architecture	503
	Enterprise AI Agents & Multi-Agent Systems	510
	Production-Ready Agentic System Design	523
12	AI Security & AI Red Teaming	534
	AI Security Fundamentals	535
	AI Red Teaming & Defensive Techniques	543
	AI Governance & Compliance	552
13	AI Infrastructure Engineering	560
	GPU Computing Fundamentals	561
	Production AI Serving	569
	Distributed AI Infrastructure	578

14	Fine-Tuning & LLM Customization	587
	Fine-Tuning Fundamentals	588
	Parameter-Efficient Fine-Tuning (PEFT)	598
	Human Feedback & Alignment	606
15	Multimodal AI Engineering	615
	Computer Vision & Image Models	616
	Audio & Video AI	624
	Production Multimodal Systems	631
16	AI Product Engineering & Real-World Projects	638
	AI Product Development	639
	Building Enterprise AI Applications	648
	Production Deployment & Scaling	657
17	Forward Deployed Engineering	663
	Customer Problem Discovery & Technical Scoping	664
	Rapid Prototyping & AI Solution Development	671
	Production Deployment & Customer Integration	679
	Customer Engineering & Communication	687
